SEMINAR VIDEOS/DVDS

ONE DAY SEMINAR

This one day seminar is eight hours of a professional teaching seminar clearly presented using PowerPoint slides along with lecture, discussion and hands on testing of participants with IAA. Each seminar is presented on high quality VHS tapes or DVDs and categorized to provide you with summary information of its content.

INTRO TO IAA

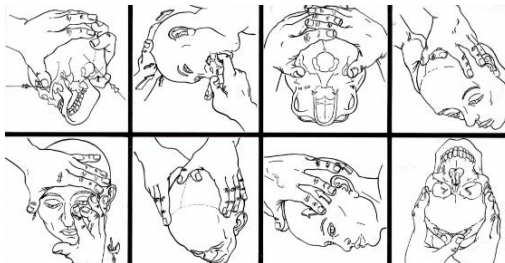

This 20 minute Introduction to Integrated Autonomic Analysis© Video is a very cost effective marketing tool for every practitioner. Sending this informational video to educate new patients before their appointment and explaining the testing technique saves valuable time and ultimately increases production. The patient can either return the video at the time of the appointment or share it with friends, causing a domino effect of referrals. The Intro to IAA video is quality produced, packaged and customized for each practitioner with his /her name, address and telephone number on both the cassette and video.

TMJ & CRANIAL TECHNIQUES

This is a unique collection of case demonstrations of various Cranial Osteopathic releases including:

- Zygomatic Arch release
- Parietal Bone release
- Lacrimal Bone release
- Rib Torque release

This video contains many TMJ decompression releases, adjustments and Cranial Diaphragm demonstrations on patients and detailed descriptions of finger placement.

Each seminar presented by Dr. Warren is videotaped by professional media specialists with broadcast quality imagery. The seminars are acquired on digital videotape in order to capture and maintain the high quality standards that you've come to expect. All tapes/DVDs come with a 14 day guarantee. If any tape/DVD malfunctions within this time period, a new tape/DVD will be mastered from the original and sent to you at no charge.
